

Combining Keywords with Boolean Connectors

AND → **decreases** → **narrows**

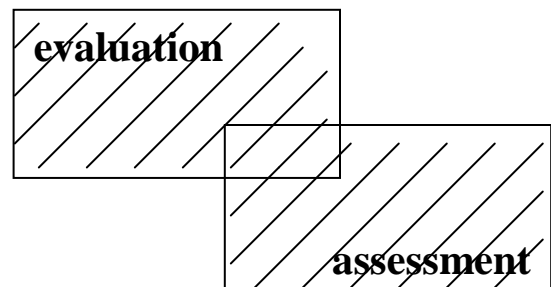

Example: computers **and** education

The dark area represents articles containing **both** terms.
NOTE: Do not substitute an ampersand (&) for the word “and.”

OR → **increases** → **broadens**

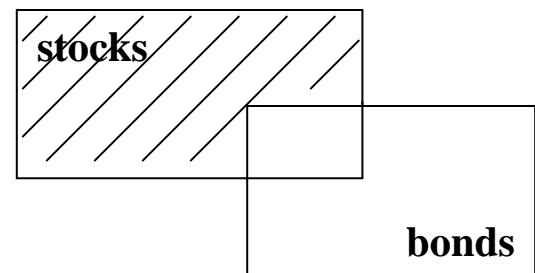

Example: evaluation **or** assessment

The dark area represents articles containing **either** term or **both** terms.

NOT → **eliminates** → **deletes**

Example: stocks **not** bonds

The dark area represents articles **without** the second term.
